2.	Tender and item rate contract for supply of furniture IAFW-1815-R		
3.	General Conditions of Contracts IAFW-1815-Z (1969-Print) including Errata and amendments to IAFW-1815-Z		
4.	Particular specification including key specification with drawing No		
5.	List of Drawings		

NOTICE INVITING TENDER (NIT)

1.	Name of work	PROVN OF NEW FURNITURE AGAINST CONDEMN FURNITURE AT BSO UNDER GE SHILLONG
2.	Estimated Cost	As per Bid documents
3.	Period of completion	180 DAYS
4.	Website/portal address	https://gem.gov.in GeM Portal
5.	Information & Details:	
	(a) Bid download/sale start date	As per GeM Bid
	(b) Bid submission start date	
	(c) Bid submission end date	
	(d) Date of bid opening	
6.	Bid issuing and Accepting Officer	Commander Works Engineer Shillong

7. **Earnest Money Deposit** Bidders should ensure that their original physical Earnest Money Deposit (EMD) instruments (as applicable) reach the office of Accepting Officer within 7* days of bid submission end date (*The number of days to be mentioned shall be as decided by the Accepting Officers, but it shall not be less than 5 days) failing which following action shall be taken.

(a) In case of Bidder, where scanned copies of instruments for Earnest Money Deposit (as applicable) have been uploaded in but the same are not received in physical form within stipulated period, such tenders shall not qualify for opening of financial bid.

8. **e-PBG**: The lowest bidder is required to give performance security in favour of Accepting Officer in the form specified. However, rate of Performance Security amount shall be 3%.

9. GENERAL INSTRUCTIONS FOR COMPLIANCE

9.1 The bid received only in the electronic form will be considered. All bids shall be submitted on <https://gem.gov.in> portal. Documents should be scanned and forwarded in 'pdf' form and 'xls' form as indicated.

9.2 Bids shall be uploaded on on <https://gem.gov.in> portal on or before the bid closing date mentioned in the tender. No tender/bid in any other electronic or physical form like email/fax/by hand/through post will be considered.

9.3 Bid Tech and financial shall be uploaded online well in time.

9.4 The Bidder shall employ Indian Nationals after verifying their antecedents and loyalty.

9.5 The Bidder shall quote his rate on the BOQ file only. No alteration to the format will be accepted, else the bid will be disqualified and summarily rejected.

NOTICE INVITING TENDER (NIT)

1. A tender is invited for the work as mentioned in Appendix 'A' to this NOTICE INVITING TENDER (NIT).
2. The work is to be completed within the period as indicated in aforesaid Appendix 'A' in accordance with the phasing, if any, indicated in the tender from the date of handing over Contract Order, which will be on or about two weeks after the date of Acceptance of Contract.
3. The Office of HQ CWE SHILLONG will be the Accepting Officer here in after referred to as such for the purpose of the Bid.
4. The bidder whose bid is finally accepted shall submit **e-PBG** as per condition 14A of IAFW-1815Z within the stipulated period failing which action as per provisions given in condition 14A shall be taken. Rate of Performance Security amount shall be 3% as stated Condition 14A.1 of IAFW-1815Z and GeM Term & Conditions.
5. The earnest money will return wherever applicable to all unsuccessful bidders by endorsing an authority on the deposit-at-call receipt for its refund, on production by the tenderer.
6. Any tender/bid which proposes any alteration to any of the conditions laid down or which proposes any other condition or prescription whatsoever, is liable to be rejected.
7. The Accepting Officer reserves the right to accept a tender submitted by a public Undertaking, giving a price preference over other Bids which may be lower, as are admissible under the Government Policy. No claim for any compensation or otherwise shall be admissible from such bidder whose bid is rejected.
8. Accepting Officer does not bind himself to accept the lowest of any tender/bid or to give any reason for not doing so.
9. This **Notice Inviting Tender (NIT)** including Appendix 'A' shall form part of the contract.

GENERAL CONDITIONS OF CONTRACTS (IAFW-1815-Z)

A copy of the General Conditions of Contract IAFW-1815-Z (1969 Print) with errata 1 to 32 and amendment No 1 to 41 has been supplied to *me / us and is in *my / our possession. *I/We have read and understood the provisions contained in the aforesaid General Conditions of Contract before submission of this tender and *I / We agree that *I / We shall abide by the terms & conditions thereof, as modified, if any, elsewhere in these tender documents.

It is hereby further agreed and declared by *me / us, that the General Conditions of Contract (IAFW-1815-Z : 1969 Print) including conditions 37 thereof pertaining to settlement of disputes by arbitration containing 44 pages with Errata 1 to 32 amendments Nos 1 to 41 form part of these documents.

*Delete whichever is not applicable.

Note:-

In case the tenderer is not in possession of any of the documents referred above he should obtain a copy from the office of the **HQ CWE Shillong, Spread Eagle Falls, Shillong** before submission of his tender.

GENERAL

1.1 These conditions shall be read in conjunction with General Conditions of Contract 1815-Z forming part of this contract.

2. MATERIALS

2.1 All materials, articles, fittings and accessories etc shall strictly comply with the specifications given herein after in particular specifications. In absence of any specifications of any particular item(s), the same shall be ISI marked. In cases where ISI approved product are not available, those items shall be conforming to relevant IS specifications and make as approved by GE. In case where all the above requirements are not met with then the materials shall be as per samples kept in GE's office. The contractor shall be deemed to have full knowledge of the specifications of these samples whether he inspects them or not.

2.2. The contractor shall produce samples of all materials fittings accessories etc that he proposes to use and get it approved in writing by the GE. The materials/articles, fittings, accessories etc as approved, shall be labeled as such and shall be signed by the GE and the contractor or his authorised representatives. These samples shall be kept in custody of GE.

2.3 The brands of all materials, articles and fittings etc approved together with the names of their manufacturers and firms from which supplies have been arranged shall be recorded in the stage passing register.

3. SAMPLE OF FURNITURE ITEMS

3.1 The contractor shall produce an unpainted sample of furniture items & raw materials in accordance with contract drawings and specifications, within 15 days from the date of commencement given in the work order and get it approved in writing from GE before proceeding with the manufacture of concerned articles of furniture. The samples of items of furniture shall be produced by the Contractor at MES furniture and store yard of GE.

3.2 Approved samples shall be labeled and adjusted in accordance with the provisions contained in condition 8 of IAFW-1815_Z for the purpose of payment on account.

3.3 Furniture shall be manufactured strictly in accordance with approved samples.

4. APPROVAL OF WORKS BY STAGES

4.1 Refer condition 21 of IAFW-1815-Z.

4.2 Articles of furniture shall normally be inspected by GE / BSO at the following stages: -

4.2.1 FIRST STAGE. When components of furniture items are cut to sizes.

4.2.2 SECOND STAGE. When the articles is ready in all respect but before painting/polishing.

4.2.3 THIRD STAGE. After articles is finally delivered after painting/polishing.

4.3 Omission of inspection at any stage, or inspection and approval in the initial stage shall not absolve the contractor from his liability/responsibility of producing the articles in

accordance with drawings, specifications and approved sample. Supplies will not be treated as completed until finishing is carried out and articles are approved and accepted by GE.

4.4 The furniture items supplied shall finally be checked by a BOO ordered by Accepting Officer before issuance of completion certificate by GE.

5. **BRANDING AND MARKING ARTICLES OF FURNITURE** : - All articles of furniture to be supplied under this contract shall be identified by means of label indicating the Contract No, Name of firm etc fixed at the place shown in drawing. However, in case of certain items in respect of which location for fixing label is not shown in the drawings, it shall be fixed in at such place as directed by the GE. Label shall be of aluminium alloy.

6. **SIZE AND DIMENSIONS**: - Dimensions and sizes where shown on drawings are the finished sizes and no tolerance in respect thereof shall be allowed.

7. PROPRIETARY BRANDED MATERIALS

7.1 Proprietary branded materials such as paint and the like, quantities of which cannot be checked after incorporation in work, shall when collected at site, be recorded in Measurement Book and signed by MES representative and the contractor or his authorised representative.

7.2 He shall obtain/procure proprietary branded materials from authorised stockists. The contractor shall produce original receipt vouchers showing quantity and quality of the materials which shall comply with the specifications. These vouchers shall be endorsed dated and initialed by the BSO giving the Contract No and Name of work and certified true copy of each such vouchers signed by the BSO and the contractor shall be kept on MES record. Contractor shall produce cash purchase vouchers for the entire quantity procured in respect of fittings and new and other items to the GE for his verification and record.

7.3 The contractor shall ensure that the materials are brought in packed original sealed containers/ packing bearing manufacturer's marking/brands etc.

7.4 Materials brought at site shall be stored as directed by the BSO and those already recorded in MB shall be suitably marked for identification.

8. RELEASE OF PERFORMANCE SECURITY DEPOSIT

8.1 Refer Conditions 14A and 34 of IAFW-1815Z.

8.2 The contractor has to deposit performance security for the contract and the same shall be released after expiry of defect liability period from the date of completion of Contract for a period of 60 days and defect liability period (condition 20 of IAFW-1815Z)

9. **TESTING OF MATERIALS**: Where testing of contractor's materials is carried out in Zonal/ National Test House/SEMT Wing/Engineering College Govt Site Lab or authorized Lab, the contractor shall be liable to pay the testing charges as applicable.

PARTICULAR SPECIFICATIONS

1. Details of Schedule of quantities wherever shown on drawings are for guidance only and no claim what-so-ever for any omission inaccuracies, discrepancies therein shall be entertained.

2. **MATERIALS**: - All materials to be supplied/incorporated in supplies by the contractor shall be new.

3. **STEEL SECTIONS**: - All mild steel and iron work shall be of ordinary quality Fe-290 (Gde E- 165).

3.1 All finished steel shall be well and clearly rolled to the dimensions, sections and weight as specified in relevant IS.

3.2 The finished materials shall be free from cracks surface flaws, laminations, rough, jagged and imperfect edges and all other, harmful defects.

4. **ELECTRODES**: - Electrodes for metal welding of MS shall be as per IS-814. The mechanical properties of the weld deposit shall be such as to satisfy all the requirements of the parent metal.

5. **HOLES**: - All holes shall be accurately marked and drilled.

6. **WELDING**: - Unless specifically mentioned, otherwise, fillet weld shall be provided. Welded, joints shall be free from defects that would impair the service performance of the articles. All welds shall be free from incomplete penetration, incomplete fusion, slag including, burns, un-welded craters, cracks in the weld metal etc. Rectification of welds by caulking shall not be permitted.

7. **FINISHING**

7.1 All articles of furniture shall be finished as described here-in-after.

7.2 **PAINTING**

7.2.1 All painting as far as possible shall be carried out in dry weather and with neatly cut in edges. Surfaces not to be painted shall be protected and cleaned off as necessary.

7.2.2 Synthetic enamel paint shall be of 1st grade.

7.2.3 Red oxide primer and synthetic enamel paint shall be of same manufacturer.

7.2.4 If nothing is specified then all steel work and components (except GI or specified to be finished otherwise) shall be finished with two coats of synthetic enamel paint over one coat of red oxide primer (Zinc Chrome) including preparation of surface.

8. **SCOPE OF CONTRACT** :- The contract comprises, manufacture and supply of furniture articles as detailed and shown in drawings and specified in particular specifications part I and II and special requirement. The articles of furniture shall be delivered at furniture yard of GE.

PARTICULAR SPECIFICATIONS (CONTD...)

9. **PLYWOOD**: - The plywood shall be ISI marked and shall be approved by GE. It shall be of grade "BWR". The quality requirements of each face of the plywood shall be of type 'A' (Commercial facings). It shall be uniform in thickness, free from warps and cracks. The edges of the plywood shall be trimmed square. The thickness given is "NET" and no tolerance is allowed.

10. **Decorative Plywood**. These shall also be ISI marked and shall be approved product of BIS, where ever in drawings decorative veneers shown in drawings over plywood, these shall be decorative plywood on one face/both faces as per drawing. Decorative veneers shall be of teak wood species. The adhesive for bonding shall be synthetic resin conforming to IS-848. The thickness of plywood shown in drawing is exclusive of decorative veneers. The tolerance on the thickness shall be not more than (+) 10% and (-) 5%.

11. **TIMBER**

(a) All woodwork shall be in teakwood if not specified otherwise in these tender documents elsewhere. Timber shall be first grade kiln (plant) seasoned teakwood as per IS 1331-1971 with moisture content permissible as per IS 287: 1973.

(b) Where teak wood is indicated on drawing or specified hereinafter it shall be best quality teak wood as above, well seasoned as per sample kept in GE's Office and as approved by Garrison Engineer. Where no wood is indicated in drawings, teak wood shall be used except where specifically indicated otherwise in these specifications. All timber shall be the best of its kind. It shall be natural growth, free from shakes, knot, dot, cracks, borer holes, soft spots, termite attack & all other defects & blemishes. Knots upto 1/2 inch diameter may however be accepted if they:-

- (i) are not likely to become loose or are dead knots.
- (ii) are not in clusters or groups.
- (iii) do not occur on edges or joints or on underside of member in tension.
- (iv) do not distinguish and prominently show out in the finished articles.

(c) All timber shall be wrought, sand papered smooth and shall have corners and edges rounded wherever shown on drawings.

(d) Boardings, fillets and scantling etc. shall be straight square, sawn and planned true and smooth to the dimensions shown on drawings. However for wooden members where any dimension has been specified to be 20mm or more tolerance of 1 mm will be allowed in respect of each of such dimension of the member.

(e) Every plank shall be in one length and no joints shall be permitted.

PARTICULAR SPECIFICATIONS (CONTD...)

(f) **Width of Plank in timber** : Except where planks are specifically indicated on drawings to be in one piece, width of planks shall be as under :-

Up to and including 200mm width, planks shall be in one piece. Over 200mm and upto 400mm, planks shall be in two pieces of equal width. Planks over 400mm in width shall be made up of planks of equal width nearest to 200mm.

14. **M.S. Conduit**: Mild steel conduit shall be of square pipe or round and of sizes as shown in drawings. These shall be conforming to relevant IS. The sizes/diameter etc shown are external sizes/diameter. The thickness of pipe shall be 1.60 mm unless mentioned otherwise elsewhere. Conduits shall be free from all manufacturing defects etc. No tolerance in diameter as well as thickness of conduit shall be allowed. Conduit shall be of class 'B'.

16. **PVC Hard Rings**: These shall be of best quality and shall be of approved shape and sizes. Rubber/Bakelite rings are not acceptable.

17. **Shellac**: Shellac shall be pure varying from pale orange to yellow colour, free from resin and dirt.

18. **Methylated Spirit**: Methylated spirit shall be free from any type of contamination.

19. **French Polish**: French polish shall be of any of the following makes:-

(i) Shalimar (ii) Berger (iii) Rajdoot.

20. NAILS AND SCREWS

20.1 Iron mongry shall be fixed with steel screws, round and flat headed as required and approved by GE. Unless otherwise specified brass articles shall be fixed with brass screws. Aluminum articles shall be fixed with cadmium plated steel screws. Wooden members/articles where shown in drawings/required shall be fixed with steel wood screws conforming to IS-451. Type and size shall be as directed but shall be cadmium plated. Screws shall not be thinner than designation and of length not less than twice the thickness of boards members to be fixed. Screws and nails shall be of type and size as approved by GE.

20.2 Screws and nails shall be of type and size as approved by GE.

21. **DOWELS AND PINS**: - Dowels and pins for securing mortice and tenon joints where required shall be of solid bamboo of good quality.

22. **WORKMENSHP GENERALLY**

22.1 The work shall be executed in workmen like manner. Every part shall be true and well fitted and shall confirm to the best standard of workmanship obtainable from a high class cabinet maker.

22.2 Wood work shall be wrought on all faces unless otherwise specified.

PARTICULAR SPECIFICATIONS (CONTD...)

22.3 The work "framed" as applied to wood work shall be understood as including all the best known methods of jointing wood work together by means of mortice and tenon joints, dovetailed joints or similar joints shall be applied.

22.4 Framed joints shall be made to fit properly without any welding /filling or making up and made so as to be hidden from view.

22.5 All framed wood work shall be framed & fitted together first by fevicol or other equal adhesive and then the joints pinned except for rails of bed and charpoys. Joints of tongue and grooved or rebated joinery shall be glued when putting together.

22.6 All framed wood work and paneling shall be put framed together at 10 mm centre. No single plank of the shelf shall be fixed, removed and replaced by the contractor.

22.7 Wherever indicated shelves and bearers shall be fixed with screws at 10 mm centre to centre. No single plank of the shelf shall be fixed with less than two numbers of screws at each end.

22.8 All wood work open to view either from top, bottom or from sides, shall be finished to a smooth, true or clean surface with sand paper. However, ends of legs such as of chairs, tables, beds charpoys etc, which are in contact with the floor shall not be sand papered.

22.9 Corners of articles, where indicated shall be slightly rounded.

22.10 The joints (except joints of panels) in wood work where not shown on drawings shall be mortice and tenon for scantling and styles and dovetailed for drawer etc.

22.11 In length, scantlings, planks, fillets, boarding, shall be in one piece. The width of planks/boards shall be as shown on drawings where, however, width of planks is not indicated, planks shall be in one piece for width upto 30 cm of member and where width of member exceeds 30 cm, planks of equal width of not less than 150 mm shall be provided.

22.12 Particle boards, plywood, plastic laminated, conduits, etc. wherever to be used shall be in one piece. However, where members are of such size which cannot be obtained in one piece from any size of particle boards, plywood, laminated sheets etc. manufactured in the country, the member will be provided in more than one piece of equal sizes (maximum obtainable sizes) as approved by GE.

22.13 The grain/texture of teak ply/particle boards/laminated sheets shall be lengthwise or vertical as indicated on drawings or as directed by the EIC.

23.1 **FINISHING**. All articles of furniture shall be finished as described here-in-after.

23.2 **FRENCH POLISH**. French polishing shall be carried out as specified here-in-after of tint/shade as directed and approved by GE. All wooden surfaces of timber exposed to view shall be French polished if nothing else is indicated in drawings and these tender documents elsewhere.

PARTICULAR SPECIFICATIONS (CONTD...)

23.3 **PREPARATION OF SURFACES**. Remove plane marks with a wood scraper and smoothen surfaces with paste and sand paper No 2, fill and stop holes with paste filler prepared by mixing plaster of paris and water to a creamy consistency and adding raw sienna in quantity required to obtain the desired colour to be base. When the surface has been dried up, wipe off and set aside for 24 hours for the surfaces to harden. Rub surfaces with sand paper No 1, until it is thoroughly smooth and then clean off.

23.4 **POLISHING**. Prepare the polish in the proportion of 1 Oz. of shellac to 4 Oz. of methylated spirit. Shellac crystals shall be washed in luke warm water, remover dirt and dried before mixing with methylated spirit. Shake the mixture, until the ingredients are completely dissolved. Take pad of cotton wool and partially saturate it with the mixture. Enclose the pad in a piece of Linen cloth and supply to the surface along the grain with light even pressure. Should the wad shows any sign of sticking, it should be slightly dipped in mustered oil. Continue rubbing until some glossy appearance is obtained. Set aside for about two hours to permit surface coat to harden. Rub surface with sand paper No '0' (Zero) to remove any raised grain. Repeat polish to the surface as before.

23.5. When a clear grained smooth surface is obtained, it would be allowed to harden for about two hours. Rub surface again with sand paper No '0' (Zero) recharge wad as before and apply with straight strokes in the direction of the grains until the required glossy surface is obtained to the approval of GE.

23.6 POWDER COATING FINISH

The powder coating finish to steel members shall be by pretreating with epoxy polyester powder coating 70 microns by 7 tank processes oven dried with the following specifications:-

- (a) Dry film thickness more than 45 microns.
- (b) Salt spray test to withstand more than 1000 hours.
- (c) Adhesive as per DIN 53152 standards.
- (d) Pencil scratch hardness more than 2H.

24. **PARTICLE BOARD**. Particle board where indicated shall be provided with the following specifications:-

24.1 **VENEERED PARTICLE BOARD** - Shall be solid core, exterior grade (Grade I) type I (Commercial) or type II (decorative) as specified/ indicated on drawing and shall conform to IS-12823.

24.2 **UNVENEERED PARTICLE BOARD** – Where shown/specified shall be flat pressed, three layer or multiplayer or graded type-I (FPT-I) and conforming to IS-12823.

24.3 Core of particle boards, veneered or un-veneered shall also be FPT-I conforming to IS-12823.

24.4 The adhesive used for all types of particle boards shall be Phenolic synthetic resin, BWR grade, conforming to IS-848-1947.

PARTICULAR SPECIFICATIONS (CONTD...)

24.5 **PRELAMINATED PARTICLE BOARD**. Prelaminated particle board shall be exterior grade, grade I, phenol formaldehyde bonded, melamine faced, flat pressed three layered bearing IS No 3087 and IS 12823 with prelamination of approved shade as indicated on drawing or as decided by GE/AGE(I) and other side with white balancing lamination (PLA). Board shall have desired shade/texture/colour on one side with balancing white lamination on other side as approved by the GE.

24.6 Prelaminated particle board shall be provided where particle board/MDF board having decorative, laminated facing on one side has been shown in the drawings and drawings provisions shall be deemed to have been amended in this regard. Thickness of board shall be as indicated. Thickness of board indicated as 19mm in the drawing shall be amended to read as "18mm".

24.7 Board shall be ISI marked.

24.8 Make of Veneered plain particle board/Prelaminated particle board : Greenply Industries Ltd (Ply & Board division)/Kitply/Anchor/Bhutan Board/Novapan/Associate Décor

25. **Knobs**: - Knobs shall be of aluminium anodized dark brown or brass chromium plated.

26. **GI PIPE**: - GI pipes shall be medium grade, as per IS-1239 and as approved by the GE.

27. **GI FITTINGS**: - GI fittings such as elbow, check nuts etc shall be ISI marked. GI elbow shall be of 3 way and check nuts shall be provided on each of long rails as directed by the Engineer-in-Charge.

28. **MS FITTINGS**: - MS fittings such as clamps, frame of table shall be of flat iron 25 x 3mm all as specified and directed by Engineer-in-Charge.

29. **LOCK**: - Lock shall be of brass and approved quality by GE.

30. **GI PLAIN SHEET**: GI plain sheet shall be ISI marked and 1mm thick, grade as approved by GE.

31. **MIRROR**: Mirror shall be made of selected quality sheet glass with edges rounded or beveled as indicated. It shall be free from all flaws, specks or bubbles. The glass shall be uniformly silver plated on the back, free from silvering defects. The silvering shall have a uniform protective coating of red lead paint. The thickness of glass shall be 5 to 5.5mm unless otherwise shown/specified. Mirror shall be of Make: PRAYAG/ZIRCON/CERA/SAINT GOBAIN/MODIGUARD

32 **TAPESTORY CLOTH**

Tapestry cloth shall be of good quality (indigenous make) as approved by GE. However the cost of tapestry cloth shall not be less than Rs 350/- per meter (including taxes, discount etc.) which shall be verified and certified by GE/AGE (I) before approving sample.

33. **FOAM**: - Foam shall be of density as given in drawings. In case nothing is shown on drawings it shall be 40 density of required thickness as shown on drg.

KEY SPECIFICATIONS

Sl No	Description of item	Drg No	Brief Specification
1	Almirah large with shelves steel	FD-1031	<u>DIMENSION:-</u> Overall size shall be 1985mm high,920mm wide and 485mm deep. <u>DESCRIPTION:-</u>The base shall be made of two numbers mild steel sheet channel bases made in U shaped with ends covered . Mild steel sheet shall be 1mm thick. The base channel shall be welded at 50mm from each end of the length of 920mm and shall be up to full width of 485mm and shall be 100mm high Top, sides bottom and back of almirah shall be of 1mm thick mild steel sheet . Four shelves equally spaced of 1mm thick mild steel sheet shall be provided to make five compartments.Front shutter shall two leaves of equal size .Front shutter leaves shall have three butt hinges of 75mm fixed to each shutter and shall be side hung. All joints and welding and fixing shall be done in accordance with the standard workmanship. <u>HANDLE:</u> One chromium plated steel handle with a locking device shall be provided as shown on drawing <u>LOCKING DEVICE</u> :The locking device shall be three way locking device and shall also be provided with decorative key plate .Make of Lock-Harrison/Godrej. <u>FINISH:-</u>All steel surfaces exposed to view when placed in position shall be painted with two coats of silver grey hammer paint internally and extrenally with spray machine after preparation of surfaces.A mark of MES shall also be provided on top left corner of front shutter with visible colour. Painting shall be done with spray machine.Rest all as per drg.
2	Almirah Large steel ½ H x 1/2S	FD/E6/ MAP/18	Overall size of almirah large steel is 1900mm high, 910mm wide and 490mm deep. The MS sheet used for making sides, front, drawers, partitions, base and shelves of the almirah shall be of 20 gauge except the back which shall be of 22 gauge. Three shelves shall be fixed at an equidistant positions as shown in drg.The locker of the almirah shall be provided with safety handle and lock. The front two doors of the almirah shall be fixed with 75mm long hinges three on each side with proper rivet and welding. The weight of the locker shall not be less than 68 kgs The shelves shall be welded to sides and back of almirah internally as shown on drg.One chromium plated rod of 20mm dia shall be fixed at 75mm below the top for hanging purpose. The entire almirah shall be treated with granular silver grey shade irrespective of what is shown on drg.Rest all as per drg.
3	Almirah steel med	FD-1032	Overall size shall be 1270mm high,765mm wide and 440mm deep. The base shall be made of two numbers mild steel sheet channel base welded to bottom of almirah and shall be 100mm high. Mild steel sheet shall be 1mm thick for channel base. The base channel shall be welded at 50mm from each end of 765mm length and shall be up to full width of 440mm of almirah. Top, sides, back, bottom and front of almirah shall be of 1mm thick mild steel sheet. Three shelves equally spaced making four compartments shall be provided and shall be of 1mm thick mild steel sheet.Front shutters shall have two leaves. a steel chromium plated handle 100mm long shall be provided to the shutter. A three way locking device shall be provided to front shutters. PVC sheet of size equal to size of leg base shall also be fixed under the legs of almirah irrespective of what is shown on drg .All joints and welding, fixing shall be done according standard workmanship. All steel surfaces exposed to view when placed in position shall be painted with two coats of granular silver grey enamel paint over a coat of primer with spray machine after preparation of surfaces Rest all as per drgs

4	Almirah small (Steel) 1/2 Hanging 1/2 Shelving	FD-1034	Almirah small (Steel) 1/2 Hanging 1/2 Shelving All as shown on drawing. Overall size shall be 765mm long, 440mm wide and 1270mm high. The base shall be made of two numbers mild steel channels shape with ends covered and welded to bottom of almirah. Mild steel sheet for channel base shall be 1mm thick. The base channel shall be welded at 50mm from each end of 765mm length. Top, sides, back bottom and front of almirah shall be of 1mm thick mild steel sheet. A partition in the centre of almirah shall be provided vertically with 1mm thick mild steel sheet. Three shelves, equally spaced, of 1mm thick mild steel sheet shall be provided in one half towards left hand side. One top shelf on right hand side shall be provided matching with top shelf shall be provided with 20mm dia chromium plated steel conduit pipe of wall thickness 1.25mm and shall have sockets at both ends. Front shutter shall have two leaves. A steel chromium plated handle 100mm long shall be provided to shutter. A three way locking device shall be provided to front shutters. Each leaf of front shutter shall have two hinges of 75mm long butt hinged and shutters shall be side hung. All joints, welding and fixing shall be done in accordance with standard workmanship. All steel surfaces exposed to view when placed in position shall be painted with two coats of enamel paint over a coat of primer with spray machine after preparation of steel surfaces.
5	Bed Hard	FD/E6/MAP /08(R)	Overall size shall be 2050mm long, 900mm wide and 400mm high. All Steel shall be MS Square pipe of 18 Gauge. The head board shall be 800mm high and Foot board shall be 500mm high. The frame of head board and foot board shall be of 38mmx38mm MS square pipe. 18mmx18mm MS square pipe shall be provided in the inner of head board frame/foot board frame as shown in drg. 18mm thick both side decorative prelaminate particle board of walnut shade with PVC edging shall be screwed to MS strip arc welded to 18mm thick rectangular pipe with standard workmanship both in head board/foot board. 25mmx65mm rectangular CR pipe shall be used to make the long rails and short rails of bed hard and welding shall be done for fixing long rails to the legs irrespective of what is shown on drg. One stiffener of size 25mmx25mm shall be welded between the two legs of headboard over 150mm from the ground level. The top of bed hard shall be of 12mm thick BWR ply of approved make fixed over the four equidistant stiffener of size 25mmx25mm SQ MS pipe in line with bottom of 25x65mm long rail section. PVC shoes shall be provided to legs of bed. All metal /iron work shall be treated with synthetic enamel black after doing two coats of metal primer. Rest all as per drg.
6	Chair Writing	FD/E6/MAP /12	The frame of the chair shall be of MS tubular frame powder coated, cantilever type of size 25mmx10mm in section. Back form shall be designed with contoured lumber support for extra comfort. 120mm thick hot pressed plywood upholstered with superior quality fabric and moulded polyurethane foam with PVC lipping around shall be provided at seat and back. PU arms shall be of superior quality and reinforced with MS insert. It shall be scratch and weather resistant. Steel portion of chair shall be painted with two coats of synthetic enamel paint of black colour over a coat of primer. Rest all specifications are as per drg and directed by Engr-In-Charge.
7	Locker steel	FD-1029	<u>DIMENSION:</u> Overall size shall be 760mm long, 600mm wide and 1100mm high. <u>DESCRIPTION:</u> The locker shall be made of mild steel sheet 1mm thick. 20 mm dia conduit pipe shall be chrome plated with wall thickness of 1.6 mm shall be fixed with side sockets. Two handles chromium plated 100mm long shall be fixed to shutters with necessary riveting. One hasp and staple 75mm long shall also be fixed to shutters with riveting. The left shutters shall be provided with 100mm long tower bolt inside at upper and lower ends also. The locker shall be provided with compartments as shown in drgs made of 1mm MS sheet. <u>FINISH:</u> All steel surface internally and externally, exposed to view when placed in position shall be given two coats of green hammer paint internally and externally after properly smoothened the surface with sand paper and applying putty. A Mark of MES shall also be provided at top left corner of front shutter of visible colour. Painting shall be done with spray machine. Rest all specifications are as per drg.

8	Rack Shoe Steel	FD/E6/MAP /02 (R)	Size : Overall size shall be 700mm long 300mm wide and 880mm high. Description : The legs of the shoe rack shall be of 25mm dia MS pipe of 18 gauge. The five shelves of the rack shall be of 20mm dia MS pipe of 18 gauge welded to legs. The shelves shall have 3mm dia Ms rod 9 Nos in widthwise and 03 Nos in lengthwise welded to 20mm dia shelf frame. FINISH. All steel surfaces shall be power coated as per direction of Engr-in-Charge/GE. REST : All as shown in drawing .
9	Charpoy with Hard Top	FD/MAP- II/01	<u>DIMENSION:</u> Overall size shall be 1980mm long, 900mm wide and 440mm high. <u>DESCRIPTION:</u> Two long rails and two short rails shall be of 25mmx65mmx16 guage MS rectangular pipe .The legs shall be of size 32mmx32mmx16 guage welded to long and short rails as shown on drg.Two stiffeners of size 25mmx25mmx16 guage shall be provided in equidistant between two opposite long rails. Six number cleat of size 25mmx60mmx6mm shall be welded with frame to support ply. Two stiffeners joining legs of size 25mmx25mmx16 guage shall be provided at 150mm from ground level .12mm thick commercial plywood shall be provided for top as shown on drg with proper nut and bolt .PVC hard rubber shoes shall be fixed at bottom of each legs. <u>FINISH:</u>All steel surfaces shall be Pre treated with epoxy powder caoted oven baked with black colour.
10	Table bed side	FD/E6/MAP /15R	The overall size of the table bed side shall be 450mm x 450mm x 600mm from rear and 450mm x 450mm x 500mm from front as shown in drg.The entire frame of table bed side shall be made up of 18mm MS square pipe (18 Gauge) duly black powder coated. The two sides and top shall be made up of 18mm thick prelaminated particle board exterior grade. The Back of the table except the top portion as shown in drg shall be provided with 6mm commercial plywood BWR grade duly screwed to frame. The two sides, back and bottom of drawers of the table shall be made up of 12mm thick commercial plywood irrespective of what is shown on drg, except the front side which shall be of 18mm thick prelaminated particle board exterior grade. The drawers shall be made functional on teak wood runners fixed inside the tables shown on drg.The drawers of the tables shall be provided with 100mm long CP handles .Rest all as per drg.
11	Chair Computer	FD/E6/MAP /01	The Base pedestal assembly of chair computer shall be of dia 700mm and 1060mm high .The pedestal assembly shall be provided with injection molded in black 30% glass filled nylon. A 10.5mm dia forged bright Zinc plated MS Castor Pin is of press fitted into each prong for holding the castors. The seat and back of the chair computer shall be made of 12mm thick hot pressed plywood upholstered with fabric and moulded polyurethane foam. The back form shall be designed with contour lumber support for extra comfort with PVC lipping allround.The back rest shall be adjustable and consist of drop lift mechanism and shall be adjusted in the insert .It shall be scratch and weather resistant. Rest all as per drg.and as per sample approved by BSO/GE
12	Teapoy Varandah	FD/E6/MAP /17	Overall size shall be 700mm long 400mm wide and 540mm high. The legs, top centre stiffener, top rails and bottom rails shall be of 18mm square MS pipe of wall thickness 1.6 mm.Base tray made of 5mm dia MS bar 12x10 nos at equidistant shall be made and fixed as shown on drg.The top shall be of 18mm thick pre laminated particle board of approved shade and the edges shall be covered with 4mm thick teak wood beading. Hard rubber shoe shall also be fixed to the bottom of each leg.The steel frame shall be painted with synthetic enamel black colour. Rest all as per drg.

13	Chair Dining Officer with cushion seat	FD/MAP-II/04	Size : Overall size shall be 450mm wide x 450mm deep and 950mm height, 450mm high upto seat. TIMBER : All wood work shall be of first class seasoned teakwood. FOAM : The seat of chair shall be made of 40 density foam cushion having thickness 75mm . The cushion shall be placed and pasted on 12mm BWR plywood as per size of seat duly covered with approved tapestry cloth of rate not less than 350 per mtr. PLYWOOD : Commercial plywood 12mm thick IS : 303 BWR grade of appropriate size shall be provided. SHOE : 20mm dia Nylon buffer/shoes shall be provided at bottom of legs. POLISH : All exposed wooden surface shall be French polished with high glossy finish . REST : All as shown in drawings.
14	Table dining 6 persons	FD-273	Size : Overall size shall be 1500mm x 900 mm x 750mm TIMBER : All wood work shall be of first class seasoned teak (hard) wood. TOP : 18-19 mm thick prelaminated MDF board exterior grade and all edges of top shall be covered with 6mm thick teak wood beading. POLISH : All exposed wooden surfaces shall be French polished with high glossy finish . REST : All as shown in drawings.
15	Table dining 8 persons	FD-273	Size : Overall size shall be 1800mm x 900 mm x 760mm TIMBER : All wood work shall be of first class seasoned teak (hard) wood. TOP : 18-19 mm thick prelaminated MDF board exterior grade and all edges of top shall be covered with 6mm thick teak wood beading. POLISH : All exposed wooden surfaces shall be French polished with high glossy finish . REST : All as shown in drawings.
16	Table dressing Ladies with mirror with stool dressing	FD/MAP-II/07	DIMENSION:The overall size of the table dressing shall be 1150mm long 380mm wide and 1700mm high. DESCRIPTION:- The sides, top ,back and front of the base unit shall be of 18mm thick prelaminated MDF board. The bottom of the side units shall be of 12mm thick commercial plywood. The sides and back drawers shall be of 12mm thick prelaminated MDF ,bottom of the drawers shall be of 6mm thick commercial ply whereas the front of the drawers shall be of 18mm thick prelaminated MDF board.5mm thick electro copper plated mirror shall be fixed over 6mm thick plywood back. The plywood shall be fixed on two vertical hardwood member of size 45mmx35mm .a horizontal support of size 30mmx20mm shall be provided in between two vertical members. The Overall size of the stool shall be 440mm long 350mm wide and 425mm high. The four sides shall be of 18mm thick prelaminated MDF .The top of the stool shall be of 12mm thick plywood openable as shown in drg.Four heavy duty revolving nylon double wheels shall be provided at base below the 6mm base ply fixed over wooden runner 20mmx20mm.The seat of the stool shall be 75mm high ,made of foam 40 density covered with tapestry cloth as approved by Engr-In-charge/GE.Rest all as per drg. Overall size shall be 900mm long, 380mm wide and 1700mm high (height is the mirror). FINISH:All wood surfaces exposed to view when placed in position shall given high gloss French polish with lacquer finish.Rest all as per drgs

17	Table Centre	FD-274	TIMBER : All wood work shall be of first class seasoned teak (hard) wood. Side rail shall be provided all around of Table centre and long stiffner in the middle of short stiffner shall be provided. TOP : 18-19 mm thick pre laminated MDF board exterior grade (Make : Green panel max/ century/ Archid ply) in colour/shade as approved by GE and all edges of top shall be covered with 4mm thick teak wood beading duly French polish with high glossy finish. POLISH : All exposed wooden surfaces shall be French polished with high glossy finish upto the satisfaction of Engr-in-Charge. RST : All as shown in drawing and as directed by Engr-in-Charge.
18	Hat stand with mirror	FD-233	SIZE : Overall size shall be 1270 mm long, 710 mm wide and 35 mm thick. DESCRIPTION : (a) All wood to be used shall be 1st class hard teak wood. (b) It shall be made of BWR plywood of IS : 303 of specified thickness. (c) Looking mirror shall be 5.5 mm thick (Made – Modi gurad/ Saint Gobin/ Swastik). (d) Pegs shall be of stainless steel of size 120mm long as approved by GE, FINISH. All plywood and wooden surface shall be French polished in finish as approved by GE after preparation of surface. REST. Rest all specifications and dimensions are as per drg..
19	Sofa Set 5 seater	FD-373	DIMENSION: Overall size of one Seat shall be 670mm long and 745 mm wide and 530mm high up to arm rest level. DESCRIPTION: The sofa set single seater shall consist of one single seats. All wood shall be of first class teak wood (MP). Legs of sofa set shall be 70mm x35mm in section teak wood . Front legs shall be jointed by 100mm x 35mm in section wooden rail in front . Front and rear legs shall be jointed with 100mm x 35mm in section wooden rails in sides. 100mm thick seat cushion and back cushions shall be of size 530mm x 560mm (one numbers in seat and one numbers in the back). The cushion shall be of cool foam or any other superior quality foam of 40 density as approved by Engineer-in-charge. Cushion shall be covered with approved color tapestry cloth (approved by GE , not less than Rs:300/meter) or as directed by Engineer-in-charge. FINISH: All wood surface exposed to view when placed in position shall be French polished with lacquer finish rest. Rest all as per drg.
20	Table writing	FD-275	DIMENSION: Overall size shall be 1145mm long, 600mm wide and 760mm high. DESCRIPTION: All wood shall be of first class hard teak wood except top and right hand side drawer cabinet. Legs shall be of 35mmx55mm in section and 717mm high having 5mmx5mm in section groove at the top of legs at the portion when placed in position. Top of table shall be of 18 mm thick pre-laminated MDF board with 4mm teak wood edging al-round the top of table. Two short stiffeners of teak wood of size 50mmx40mm in section irrespective of what is shown on drg shall be provided between legs at 100mm from bottom of legs. Sides of the box which house the drawer and cabinet shall be 18mm thick prelaminated particle board exterior grade. Sides and back of drawers shall be of 12mm thick teak wood planks. Bottom of drawers shall be of 6 mm thick plywood commercial. 6mm thick plywood commercial 75mm high partition shall be provided in the drawer. Shutter for cabinet shall be fixed with piano type continuous hinges. Lock shall be provided to drawer and shutters. Recessed handle shall be provided to drawer and shutter. 25mm dia and 25mm high rubber shoes shall be fixed to bottom of legs. FINISH: All wood surfaces shall be French polished with high gloss finish. Rest all as per drg.

21	Teapoy	FD-278	DIMENSION: The overall size shall be 600mm long, 450mm wide and 540mm high. DESCRIPTION :The legs shall be 60mmx30mm in section and 497 mm high and shall be of teak wood.5mmx5mm in section groove shall be provided at the visible portion of top of legs. Top rails of teak wood of 20mmx50mm in section and 510mm long shall be provided between the legs. Bottom rail of teak wood of 20mmx50mm in section and 420mm long shall be provided between legs, widthwise at 100mm above the bottom of legs. A centre rail of size 20mmx50mm shall also be provided lengthwise at centre in between the side bottom rails irrespective of what is shown on drg.25mm thick and 25mm dia hard rubber /PVC rings shall be fixed to the bottom of all legs fixed with 30mm long screws.Top of table shall be of 18 mm thick pre-laminated MDF board with 4mm teak wood edging al-round the top of table. FINISH: All wood surfaces shall be French polished with high gloss finish. Rest all as per drg
22	Peg Table	FD-277	DIMENSION; Overall size shall be 450mm long,300mm wide and 380mm high. Legs shall be of teak wood of section 30mmx50mm.The legs shall be 362mm high.5mmx5mm in section groove shall be provided on the top of legs which shall be visible when placed in position.Two nos top rails of section 20mmx40mm of teak wood shall be provided connecting legs.Two bottom rails of size 20mmx40mm shall be fixed between the legs .A centre stiffeners of size 20x40mm shall be provided at centre of side bottom rails for extra support irrespective of what is shown on drg.Top of the table shall be of 18mm thick pre-laminated MDF board with 4mm teak wood edging all round the top of table. FINISH: All wood surfaces exposed to view when placed in position shall be french polished with high lacquer finish.Rest all as per drg.
23	Bath Stool PVC	FD/E6/MAP /07	Over size : 400 mm long, 300 mm wide and 250mm height. It should be made of 5mm thick and hard polymer plastic. Plastic (Make : Nilkamal/Supreme/Cello/Brite or equivalent). 3x10 thick stiffner moulded along with the seat in single piece. Legs dia shall be 25 mm.
24	RECEPTACLE PVC	FD/E6/MAP /13	DIMENSION/CAPACITY:-The receptacle shall be of capacity 20 ltrs DESCRIPTION:The body of receptacle PVC shall be made up of thick polymer plastic of thickness not less than 2.5mm,provided with swivel lid and iron handles on both sides as shown in drg.

NOTES	
1	CONTRACTOR TO CHECK AND VERIFY ALL DIMENSIONS BEFORE EXECUTION OF THE WORK. FIGURED DIMENSIONS SHALL BE FOLLOWED.
2	ALL DIMENSIONS GIVEN ARE IN MILLIMETRES
3	ALL JOINTS/WELDING/FIXING SHALL BE DONE IN ACCORDANCE WITH THE STANDARD WORKMANSHIP AND SPECIFICATIONS.
4	ALL WELDED CONSTRUCTION AND STEEL WORK SHALL BE PAINTED INTERNALLY & EXTERNALLY WITH OLIVE GREEN OR SILVER GREY OR AS REQUIRED SHADE OVER A COAT OF PRIMER
5	SHUTTERS SHALL BE PROVIDED WITH A CHROMIUM PLATED HANDLE AND THREE WAY LOCKING DEVICE. DRAWING SUPERSEDES DRG No. FD-67(N) SHEET No. 1/1
